Specification

Material	PLA
Operating temperature	190~225°C
Diameter	1.75 ± 0.03mm
Density	1.25 ± 0.05g/cm ³
Melt flow rate	5~7g/10min
Water absorption	0.4%
Tensile strength	≥ 60MPa
Tensile elongation	≥ 3.0%
Flexural strength	≥ 90MPa
Charpy impact strength	≥ 10KJ/m ²
Net weight	500kg
Size of reel	200mm
Product features	
1. Professional technical team	Equipped with sophisticated talents In cooperation with famous universities
2. Perfect production process	Advanced international standard production line Precisely controlled by PLC
3. Reliable product performance	Eco-friendly 100% USA original, biodegradable
